1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Brewer et al., Hanisch or Tanitsu et al.

3. Claims 1 to 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Marks et al.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanisch or Tanitsu et al.

6. Claims 1 to 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayes et al.

7. Each of these rejections relies on the rationale detailed in the previous office action. Since applicants rely on the same argument in an effort to overcome each of these rejections, the Examiner will address these arguments simultaneously.

Specifically, in an effort to overcome each of these rejections, applicants state that the reference does not teach or suggest the use of the composition for the hydrophobic surface treatment of a glass surface and that applicants have discovered that the

Art Unit: 1712

claimed composition provides hydrophobic surface treatment of a glass surface. This position is not sufficient in establishing novelty and/or unobviousness for many reasons.

First and foremost, it is well settled that the discovery of a new and unobvious property and use does not overcome anticipation when the claimed composition is known. Since the composition per se that is claimed is met by the prior art, there is no requirement that the prior art teach the same properties or use as applicants. Furthermore, products of identical chemical composition cannot have mutually exclusive properties. A chemical composition and its properties are inseparable. Therefore, if the prior art teaches the identical chemical structure (as in the instant situation), the properties applicant discloses and/or claims are necessarily present.

On the other hand, the Examiner notes that it is well known in the art that silane coatings provide hydrophobic properties to the substrate being coated. For instance, a coating of methylsilane will result in hydrocarbon groups on the surface of the substrate which, obviously, are hydrophobic. Applicants' property is not an unexpected property.

As such, applicants have failed to overcome the prior art rejections by showing any novelty or unobviousness over the prior art.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
